Biography

I was born in Istanbul in 1966. I completed my undergraduate education at İstanbul University, Faculty of Science, Department of Biology. After graduation I completed my master and doctoral studies at the University of Delaware in the United States of America. I have been studying how the brain controls the reproductive system and how it regulates body weight. I started as Assist Prof at Abant İzzet Baysal University in 1997 and I became a full professor in 2008. In 2009, I transferred to Çanakkale Onsekiz Mart University and I still work at the Department of Biology. I do study molecular and physiological control mechanisms between brain and obesity.
